

Species of the week
Yet another fungus

And I don't make any apology for this; this fabulous fungus sent in by Moggy, I will let him explain – “Found this little beauty in my local nature reserve 'Fens pool', near Dudley, West Midlands. Green Elf Ear. No larger than 5mm. Stunning colour. The log they are on is around a metre long, for some idea of scale”.

Stunning colour and a great find, top marks to Moggy!
Just shows that we all have to take time and look
